

Sustainability report

GRESPANIA

Introduction

From its very beginning, Grespania's respect for the environment has been one of its fundamental values. Grespania has been a pioneer in the development of environmental sustainability policies, targeting its research and innovation at this field. True to this commitment, it has implemented various environmentally-friendly programmes, such as the installation of its wastewater treatment system, the cogeneration project or planning its tile manufacturing plant in line with the zero-waste concept.

Throughout its history, Grespania has been firmly committed to developing strategies aimed at minimizing the impact of its production processes on the environment. To that end, it has always used natural raw materials of the highest quality and has developed processes involving the most advanced technologies.

Grespania's current range of products includes floor tiles that minimize the generation of waste during construction projects, and wall tiles that purify the air in the atmosphere.

Keenly aware of the need to slow climate change and protect the environment, Grespania has incorporated into its business policy and its strategic plans measures that help bring about short-, medium- and long-term improvements in the environment and in society.

4 Environmental impact

4.1 ATMOSPHERIC EMISSIONS

The emission of solid particles into the atmosphere has adverse effects on air quality, damaging human health and agricultural productivity.

Mindful of this fact, Grespania has installed baghouse filters in all processes that may produce dust, thus preventing the emission of particles to the outside. These particles are reintroduced into the production process and reused.

To verify that the emissions lie within the legally-permitted ranges and are not harmful to people or the environment, regular measurements are carried out by an independent laboratory and the relevant government body is informed of the results.

5.4 NO TOXIC EMISSIONS DURING MANUFACTURING

In addition to assuring the sustainability of the processes and the provenance of the raw materials, Grespania guarantees that all its employees have a safe and ethical workplace where people's rights and dignity are respected.

All products manufactured by Grespania are guaranteed to be free of toxic or polluting substances. Furthermore, they are completely inert and do not produce electrostatic charges. To ensure that this is the case, the raw materials are monitored and the products are regularly tested in accredited external laboratories.

GRESPANIA S.A.
CV-16
Ctra. Castellón-Alcora km 2,200
P.O.Box 157
